

Professional Summary

Program advisor with 5+ years designing and delivering capacity development initiatives for residential energy efficiency and resilience programs across Canada and Mexico. Proven in training delivery, knowledge mobilization, stakeholder network development, and technical coaching. Track record translating technical content into accessible guidance for government, community, and industry audiences.

Career Highlights

- **Municipal Net-Zero Standards:** Led building benchmarking aligned to ASHRAE 90.1 and Canada 2030 targets, delivering a retrofit recommendation report and stakeholder presentation.
- **Solar Program Delivery:** Coordinated end-to-end delivery of 200+ distributed PV projects totaling 3 MW across documentation, approvals, and multi-party coordination.
- **Energy Policy Implementation:** Authored Mexico's first national energy efficiency guide for extreme-heat climates, training 150+ households on ASHRAE 90.1 standards equivalent standards.

Key Skills

Capacity Development Program Design & Delivery · Training, Workshops & Peer Learning Facilitation · Knowledge Mobilization & Case Study Development · Municipal & Multi-Stakeholder Engagement · Residential Energy Efficiency & Retrofit Programs · Performance Measurement & Reporting · Partnership & Network Development · MS Office

Professional Experience

Granted Consulting

Vancouver, BC (Remote) | June 2025 - Present

Account Manager, Cleantech & Natural Resources | Green Program Delivery

Managed end-to-end delivery of decarbonization, hiring and training programs across multiple jurisdictions, coordinating technical scoping, documentation, and stakeholder timelines from intake to funding approval.

- Scoped and defined program roadmaps for ~30 active clients across decarbonization and workforce training initiatives, translating energy audits and emissions data into compliant, fundable submissions.
- Secured CAD 200K+ in approved funding by coordinating eligibility assessments, technical documentation, and multi-party stakeholder timelines.
- Administered ongoing program delivery, ensuring audit readiness, regulatory compliance, and funding release across multiple Canadian jurisdictions.

Zendelity

Ottawa, ON | August 2024 - June 2025

Director of Product Growth

Led platform rollout and operational enablement for a regulated enterprise environment, coordinating compliance requirements, stakeholder needs, and execution timelines.

- Coordinated pilot implementations with early adopters, managing timelines, user feedback, and technical inputs to ensure successful program delivery.
- Translated compliance requirements into workflows, KPIs, and dashboards, improving operational consistency and execution visibility.
- Presented adoption progress and operational insights to executives, supporting strategic decisions and program continuity.

Toronto and Region Conservation Authority

Toronto, ON (Remote) | October 2024 - March 2025

Project Lead, Newcomer Youth Green Economy Project (Internship)

Delivered applied climate research and low-carbon technology assessment aligned with Canada 2030 emissions-reduction targets.

- Co-led a nine-person team delivering research outputs on schedule through structured work plans and quality assurance.
- Evaluated seven low-carbon technology pathways using cost, risk, and feasibility criteria, supporting shortlisting of three priority options.
- Prepared technical summaries and briefing materials to support internal decision-making.

Bright Inc.

Mexico | July 2020 - August 2024

Progressed from individual contributor to regional and enterprise leadership roles, delivering residential and enterprise solar programs while scaling partners, teams, and execution systems.

Partner Manager, Enterprise Solar

- Led delivery of USD \$1-2M enterprise solar projects, coordinating clients, installers, and internal teams through commissioning.
- Managed a delivery partner network of 25 partners, improving coordination, quality control, and execution.
- Launched and scaled a pilot enterprise solar program, increasing corporate adoption by ~40% within eight months.

Regional Manager, Residential Solar

- Oversaw end-to-end delivery of 150+ solar installations, achieving ~90% on-time completion.
- Implemented KPI-based operating playbooks, improving program throughput and execution consistency.
- Led hiring and onboarding of six consultants, standardizing project processes from intake to installation.

Renewable Energy Advisor

- Delivered 100+ solar projects from feasibility through installation, managing permitting, utility coordination, and environmental compliance.
- Conducted 500+ technical consultations with residential and commercial clients on energy efficiency, solar, and system design.

Comisión de Ecología y Desarrollo Sustentable (CEDES)

Mexico | July 2019 - June 2020

Led a government-funded research program to design and deliver Mexico's first national energy efficiency guide for extreme-heat climates, from technical research through stakeholder training.

Project Director, Energy Efficiency

- Delivered training to 150+ municipal inspectors and households on ASHRAE 90.1 equivalent standards, accelerating program adoption across extreme-heat regions.
- Developed cost-benefit analyses for insulation and HVAC bundles to support residential program adoption and decision-making.
